

PRO TryptoZen™

Now you can help your patients reduce stress and anxiety safely and effectively with no known side effects, addictive properties, drug interaction, or drug buildup.

Researchers have isolated and patented the anxiety-reducing milk peptide contained in Professional Series (PRO) TryptoZen™.

Clinical tests show PRO TryptoZen helps:

- Reduce stress and anxiety... comparable to benzodiazepines
- Lower elevated blood pressure and cortisol levels while maintaining normal heart rate
- Promote restful sleep

Stress is classified as anything (good or bad) that disrupts the body's mental, physical or emotional balance. Stress is a normal part of life; but, when it becomes constant or acute, it can have serious side effects.

Ingredients:

- Casein Derivative 167 mg
- Other Ingredients: Sodium Caseinate, Gelatin, Water, Glycerin and Titanium Dioxide
